

- 1. How will you assign a div with the class 'test' in a variable called 'demo'?**

```
var demo = document.getElementsByClassName("test");  
var demo = document.querySelectorAll(".test")
```

- 2. How will you assign a div with the id='denne' to a variable called 'unik'?**

```
var unik = document.getElementById("denne");  
var unik = document.querySelector("#denne");
```

- 3. How will you find the link in the NTNU logo top left at this page (<https://www.ntnu.no>)? (NB. The link, not the actual picture).**

```
document.getElementById("home_href").href
```

- 4. What should you write in the "Console" to make the input field for the search bar top right at this page (<https://www.ntnu.no>) say "studier"?**

```
document.getElementById("ntnu-search").value = "studier"
```

- 5. What do you need to write in the "console" to simulate a click event at the "Student i Gjøvik" button in the "Studentliv" menu? <https://www.ntnu.no>**

```
document.querySelector("#gmenuitem_1_2_Student_i_Gjøvik > a").click()
```
